Executive Summary & Global Grade

TARGET SITE GLOBAL GRADE

40_{/100}

Your site's current status **(40/100)** is significantly behind main industry competitors. AI engines have technical and semantic hesitations in recommending you.

COMPETITIVE RADAR BENCHMARKING

Legend: — Target Site - - - Industry Leader ... Niche Expert

Your Cookie Preferences

We use cookies to improve your experience, analyze site traffic, and serve personalized ads. For more information, see our [Privacy Policy](#)

Your Win Rate in AI Responses

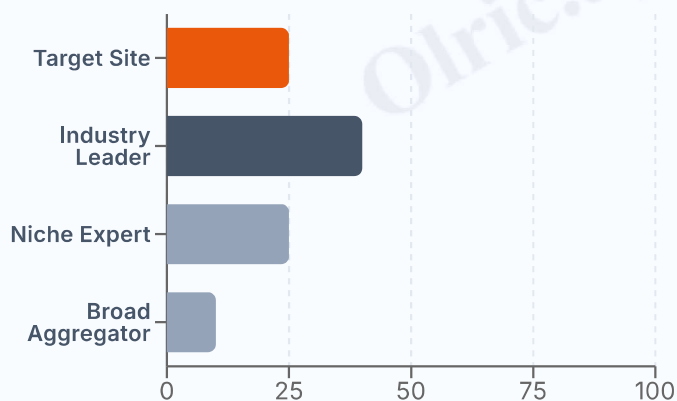

In an industry-related AI query (ChatGPT, Gemini, etc.), the probability of your brand being recommended (win rate) as the 'Target Site' was calculated. Due to low structural signals and weak metadata, the AI struggles to select you as the authority when providing an answer to the user.

SOM IMPACT

Industry Leader: Industry leaders typically have comprehensive content, extensive structured data, strong EEAT signals, and a wide range of detailed answer capsules, making them highly favored by AI models.

Niche Expert: Niche experts provide in-depth, specialized content on specific aspects of industrial kitchens, often with good EEAT and structured FAQs, making them valuable for specific queries.

Broad Aggregator: Broad aggregators offer a wide array of products and suppliers, often with basic structured data, but may lack the depth and specific answer capsules of dedicated service providers.

From the Eyes of Gemini (Google)

"Equsto is an industrial kitchen and gastronomy platform offering equipment and project planning for restaurants, hotels, cafes, and cloud kitchens. They promise to provide a suitable equipment set and quote within 24 hours through 'Mr. Equsto'."

SENTIMENT: **NEUTRAL**

From the Eyes of GPT-4o (OpenAI)

"GPT-4o would summarize this content as a direct offering for industrial kitchen equipment and project planning by Equsto, highlighting the 'Mr. Equsto' persona and the 24-hour quote promise. It would note the clear call to action but also the lack of detailed information or structured data for deeper analysis."

SENTIMENT: **NEUTRAL**

Your Cookie Preferences

We use cookies to improve your experience, analyze site traffic, and serve personalized ads. For more information, see our

Perplexity (Source/Citation)

"Perplexity would base its summary on the explicit service offering: 'Equisto provides industrial kitchen equipment and project planning for various hospitality businesses, promising quick quotes.' It would struggle to find external citations or in-depth factual content to support a comprehensive summary, leading to a very superficial output."

Claude (Anti-Hallucination)

"Claude 3.5 would interpret this content as a concise, direct business proposition for industrial kitchen solutions. It would analyze the brevity and the clear value proposition (24-hour quote) but conclude that the content lacks the depth, context, and supporting details required for a thorough analytical interpretation of the company's expertise or offerings."

Semantic Strategy: Missing Entities

The critical semantic entities that the AI scanned to position you as an industry leader, but could not clearly match at the 'Main Content' level or are completely missing, are listed below.

Endüstriyel Mutfak Ekipmanları Çeşitleri (fırınlr, buzdolapları, bulaşık makineleri vb.)

Hedef Sektörler/Müşteri Segmentleri (fine dining, fast food, catering vb.)

Equsto ile Çalışmanın Faydaları (verimlilik, maliyet tasarrufu, özelleştirme vb.)

Proje Süreci Detayları (tasarım, kurulum, satış sonrası destek vb.)

Marka Değerleri/Misyonu

Entity Authority (Entity Confidence)

Interpretability

30/100

As per the rubric, with zero structured data schemas, the maximum score for interpretability is 30, indicating very poor machine readability.

Featured Snippet / Citation Potential

50/100

The content lacks any 40-60 word direct answer capsules, FAQ schema, or list formats, limiting its ability to serve as a direct answer source for AI models, thus capped at 50 by rubric.

Missing Answer Capsule (AI Rewrite Required)

No information snippets ('Answer Capsules' of 40-60 clear words) that AI bots can directly quote were detected on your page or they are not distinct enough. You can use the AI-optimized Rewrite in the Solution Center.

Trust Analysis (E-E-A-T Signal Audit)

E-E-A-T SCORE

40

Experience, Expertise, Authoritativeness, Trustworthiness

As per the rubric, with zero authoritative external links and no clear author/about us section, the EEAT score is capped at 40, indicating a lack of trust and authority signals.

 External Authority Links: **0**

🎯 Solution Center: Action Center & JSON-LD

CRITICAL PRIORITY

Implement relevant structured data schemas (e.g., Organization, Service, Product, FAQ) to improve AI interpretability.

🌟 *Impact: Interpretability and Structured Entity Resolution scores will significantly increase (potentially above 70).*

CRITICAL PRIORITY

Expand content to include detailed descriptions, benefits, and specific services, ensuring the presence of 40-60 word answer capsules.

🌟 *Impact: Answer Richness and Answer Capsule Presence scores will increase significantly (potentially above 80). Information Density and Visibility will also improve.*

MEDIUM PRIORITY

Add an 'About Us' section, team profiles, or clear author references to enhance EEAT signals.

🌟 *Impact: EEAT score will increase (potentially above 50).*

MEDIUM PRIORITY

Integrate authoritative external links (e.g., industry standards, certifications) to further boost EEAT.

🌟 *Impact: EEAT score will increase (potentially above 75 if more than 2 links are added).*

Olric.app: AI Visibility Implementation Center

Become the authority of your industry in AI answer engines.

Part A: From Diagnosis to Treatment

This report prepared by Olric.app has taken the digital x-ray of <https://equsto.com> in the AI answer engine ecosystem. Identifying existing gaps is the first step; however, being visible in the AI world requires more than just adding technical schemas. For true success, your site must be rebuilt as a **Semantic Authority**.

Part B: Move from Insight to Execution with Olric

The Olric team helps you turn the critical findings in your report into an execution plan across content, technical structure, and competitive strategy:

Content Architecture Restoration
