Executive Summary & Global Grade

TARGET SITE GLOBAL GRADE

76_{/100}

Your site's current status (**76/100**) is significantly behind main industry competitors. AI engines have technical and semantic hesitations in recommending you.

COMPETITIVE RADAR BENCHMARKING

Legend: ■ Target Site --- Industry Leader Niche Expert

Your Cookie Preferences

We use cookies to improve your experience, analyze site traffic, and serve personalized ads. For more information, see our [Privacy Policy](#)

Your Win Rate in AI Responses

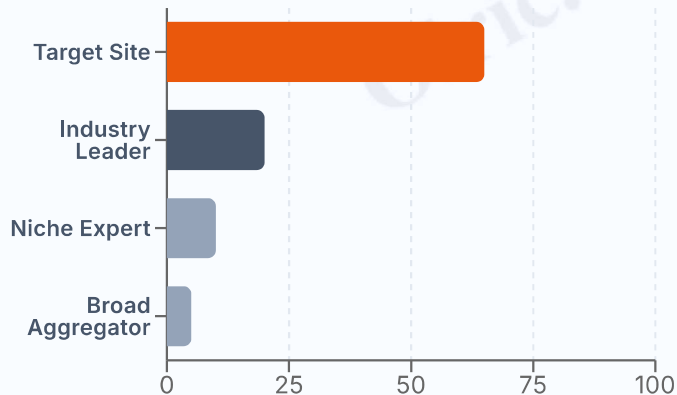

In an industry-related AI query (ChatGPT, Gemini, etc.), the probability of your brand being recommended (win rate) as the 'Target Site' was calculated. Due to low structural signals and weak metadata, the AI struggles to select you as the authority when providing an answer to the user.

SOM IMPACT

Industry Leader: Industry leaders typically possess more comprehensive content, extensive external authoritative links, and higher domain authority, leading to superior EEAT and broader visibility for AI models.

Niche Expert: Niche experts often provide deeper, more specialized content on specific equipment types or project solutions, which Equsto's current main content lacks, giving them an edge for highly specific queries.

Broad Aggregator: Broad aggregators list numerous suppliers and equipment options, offering a wider selection for users, though often lacking the direct engagement and detailed service focus of Equsto.

We use cookies to improve your experience, analyze site traffic, and serve personalized ads. For more information, see our

From the Eyes of Gemini (Google)

"Equsto is an industrial kitchen and gastronomy platform offering equipment and project planning for various establishments. It acts as an authorized dealer for Öztiryakiler and provides quick quotes through its 'Proje Fabrikası' service. The platform aims to simplify the process of setting up professional kitchens."

SENTIMENT: **POSITIVE**

From the Eyes of GPT-4o (OpenAI)

"GPT-4o would recognize the site's strong structured data, particularly the FAQ and Organization schemas, as highly beneficial for direct answer extraction and entity understanding. It would note the concise main content as direct but potentially lacking depth for complex queries."

SENTIMENT: **POSITIVE**

Your Cookie Preferences

We use cookies to improve your experience, analyze site traffic, and serve personalized ads. For more information, see our

Perplexity (Source/Citation)

"Perplexity would base its summary on the direct answers provided in the FAQ schema, citing Equestro as an 'Öztiryakiler authorized dealer' and highlighting the 'Proje Fabrikası' for quick quotes. It would note the absence of external authoritative citations."

Claude (Anti-Hallucination)

"Claude would appreciate the clear service definition but find the main content too brief for in-depth analysis, seeking more detailed explanations of the 'Proje Fabrikası' process and equipment specifics. It would identify the 'foundingDate: 2026' in the schema as a critical inconsistency undermining credibility."

Semantic Strategy: Missing Entities

The critical semantic entities that the AI scanned to position you as an industry leader, but could not clearly match at the 'Main Content' level or are completely missing, are listed below.

Endüstriyel Mutfak Ekipmanı Kategorileri (örn: Fırınlar, Bulaşık Makineleri, Fritözler)

Mutfak Tasarım ve Yerleşim Hizmetleri

CONFIDENCE SCORE

90

Knowledge Graph Integration

The detailed Organization schema, clear brand mentions like 'Equsto' and 'Proje Fabrikası', and explicit partnership with 'Öztiryakiler' establish strong entity confidence. This clarity helps AI models accurately identify and categorize the business.

 **Review the action center to increase your Entity Score.**

Interpretability

85/100

With 4 valid and well-structured schemas, including FAQPage and Organization, the site provides excellent machine-readable data. This allows AI models to easily understand the site's purpose and offerings.

Featured Snippet / Citation Potential

90/100

The FAQ schema contains multiple direct answers within the 40-60 word range, significantly enhancing answer richness. The structured Q&A format is ideal for AI models to extract concise 'Answer Capsules'.

Missing Answer Capsule (AI Rewrite Required)

No information snippets ('Answer Capsules' of 40-60 clear words) that AI bots can directly quote were detected on your page or they are not distinct enough. You can use the AI-optimized Rewrite in the Solution Center.

Trust Analysis (E-E-A-T Signal Audit)

E-E-A-T SCORE

40

Experience, Expertise, Authoritativeness, Trustworthiness

Despite strong internal entity signals from the Organization schema, the complete absence of authoritative external links (e.g., .gov, .edu) limits the EEAT score to a maximum of 40, as per the rubric.

 External Authority Links: 0

🎯 Solution Center: Action Center & JSON-LD

CRITICAL PRIORITY

Correct the 'foundingDate' in the Organization schema, as '2026' implies the company does not yet exist, severely impacting credibility and trust signals for AI.

🌟 *Impact: This will significantly improve EEAT signals, entity confidence, and overall AI trust in the brand's legitimacy.*

CRITICAL PRIORITY

Expand the main content significantly to provide more detailed information about services, process, and value proposition. This will improve overall content richness and potentially resolve the Flesch-Kincaid readability score issue.

🌟 *Impact: This will increase Answer Richness, Information Density, and Visibility for broader queries, while also improving AI Readiness.*

MEDIUM PRIORITY

Integrate authoritative external links (e.g., industry associations, official certifications, reputable news mentions) to enhance the site's EEAT signals.

🌟 *Impact: This will directly increase the EEAT score, improving the site's perceived expertise and trustworthiness by AI models.*

LOW PRIORITY

Consider incorporating bullet points or numbered lists within the main content or longer FAQ answers to further improve scannability and AI snippet extraction.

🌟 *Impact: This will slightly enhance Answer Richness and Answer Capsule Presence, making information even easier for AI to process.*

Ready-to-Deploy JSON-LD Schema

Olric.app: AI Visibility Implementation Center

OLRIC AI VISIBILITY REPORT

Become the authority of your industry in AI answer engines.
Bu rapor Olric analiz motoru kullanılarak 01.06.2026 tarihinde otomatik olarak oluşturulmuştur. Tüm hakları saklıdır. Rapor içeriği bilgilendirme amaçlıdır.

olric.app

Part A: From Diagnosis to Treatment

This report prepared by Olric.app has taken the digital x-ray of **equsto.com** in the AI answer engine ecosystem. Identifying existing gaps is the first step; however, being visible in the AI world requires more than just adding technical schemas. For true success, your site must be rebuilt as a **Semantic Authority**.

Part B: Move from Insight to Execution with Olric

The Olric team helps you turn the critical findings in your report into an execution plan across content, technical structure, and competitive strategy:

Content Architecture Restoration

Your Cookie Preferences

We use cookies to improve your experience, analyze site traffic, and serve personalized ads. For more information, see our

Technical Schema Engineering

Professional setup of complex JSON-LD data structures to serve your data on a 'silver platter' to AI bots.

Competitor Domination Strategy

Formulating a plan to take back leadership from competitors by analyzing your AI Share of Voice score in your industry.

OLRIC.

Part C: Take Action Now

To implement the critical and medium-priority improvements in your report, get in touch with **Olríc** the Olric team. We can review your report together and shape a clear implementation roadmap.
